

(e) Differentiate between genomic DNA and cDNA libraries. Discuss about the construction of genomic library.

(f) Discuss elaborately various steps involved in plant tissue culture.

(Honours Core)

Paper : BOT-HC-6026

(Plant Biotechnology)

Full Marks : 60

Time : Three hours

The figures in the margin indicate full marks for the questions.

1. Fill in the blanks : $1 \times 7 = 7$

- (a) _____ discovered totipotency.
- (b) A single strand of nucleic acid tagged with a radioactive molecule is called a _____.
- (c) The element _____ provides a very stable ultra-low temperature environment.

3 (Sem-6/CBCS) BOT HC 2/G 4 2800

Contd.

(d) _____ is a type of hybrid that contains a lambda phage cos sequence.

(e) A _____ is a collection of DNA fragments that have been cloned into vectors.

(f) The basic target of _____ is a living cell.

(g) _____ genes are used to track the physical location of a segment of DNA.

2. Answer the following questions very briefly : $2 \times 4 = 8$

(a) What are cloning vectors ?

(b) What is the principle of totipotency ?

(c) What are the applications of somatic embryogenesis in plant tissue culture ?

(d) Mention the types and uses of microinjection.

3. Answer **any three** of the following : $5 \times 3 = 15$

(a) What do you mean by colony hybridization ? Mention its practical applications.

3 (Sem-6/CBCS) BOT HC 2/G 2

3 (Sem-6/CBCS) BOT HC 2/G 3

Contd.

(b) Write a note on industrial enzymes.

(c) Where is linear DNA found ? What are the advantages of linear DNA over circular DNA ?

(d) What is the difference between androgenesis and gynogenesis ? What do you mean by direct androgenesis ?

(e) Write a note on Ti plasmid.

4. Answer **any three** of the following : $10 \times 3 = 30$

(a) Write about various types of reporter genes with their applications.

(b) What do you mean by primary and secondary metabolites ? How can biotechnological approaches enhance the production of secondary metabolites ?

(c) Give an account on transgenic crops with improved quality traits.

(d) What are restriction enzymes ? Mention the specific properties of various types of restriction enzymes, alongwith their importance for recombinant DNA technology.
